

MEDICATION CONSENT

Attached is a medication consent form required by our state licensing agency for the administration of medication. This form is the same form that we will need for any prescription or non-prescription medication your child may need at school. For non-prescription medication, a signed form from the doctor is valid for one year of administration. All medication given at school must be provided by the parent(s), labeled with child's name and in the original container.

Please note that we are not authorized to give a first dose of any medication. Your child must have had a medication at home, free of any adverse reactions prior to their time at school.

Doris L. Buckley, Director
